

NICLAS HUGDAHL

Junior Fullstack Software Developer

github.com/NiclO1337 / linkedin.com/in/niclas-hugdahl / Stockholm, Sweden

Professional Summary

Junior Fullstack Software Developer with a Diploma from the Code Institute, specializing in predictive analytics and AI. I bring 10 years of diverse back-office experience, including purchasing, sales support, graphic design, and customer service. I'm a quick learner, detail-oriented, and passionate about problem-solving. Now focused on software development, I'm eager to contribute to a dynamic team and continue growing in the tech industry. Outside of work, I enjoy yoga, cycling, CrossFit, nature walks, and gaming.

Recent Projects

Sápmi Connected. A directory/discovery platform for Sámi people to find Sámi associations and events beyond their own, building a cross-association network.

Technologies used: Next.js with TypeScript for the frontend and Django REST API for backend.

Weightlifting Calculator. A simple React-based tool to help Olympic weightlifters quickly calculate training weights from their 1RM (one-rep max). <https://github.com/NiclO1337/weightlifting-calculator>

Technologies used: React with JavaScript.

Work Experience

2024 – 2025 Hotel Copenhagen ApS Receptionist & Fullstack Developer

- Initially worked as a receptionist, learning the hotel's operations and identifying areas for improvements.
- Introduced modern digital workflows, reducing reliance on paper and saving both time and costs.
- Designed and built a Fullstack application using Django, creating an internal intranet with custom productivity tools, greatly improving efficiency and communication.

2013 – 2024 Rodemreklam AB Procurement & Project Coordinator

- Started in a back-office role, managing quotations and communication with global suppliers.
- After 2014, took on graphic design tasks, creating proofs and final artwork.
- Attended international trade fairs to build supplier relationships and stay informed on trends.
- Administered clients' e-commerce platforms, including managing content, orders, and user accounts. Provided ongoing customer support, assisting with login issues, order placement, and other system-related inquiries. Delivered internal IT support to colleagues by troubleshooting technical issues and assisting with the daily use of systems and tools.
- From 2018, expanded my role to include customer service and project management, taking full ownership of the process—from product selection and supplier coordination to order management and delivery.

Certificates/Courses

- | | |
|------------------------|--|
| ● Udemy 2025-2026 | React - The Complete Guide 2025 |
| ● Udemy 2025-2026 | 100 Days of Code: Python |
